Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T and Verizon to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

Sincerely,

Fabricio Lacerda

Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Diane Sampson

FCC Chairman Kevin Martin

Dear FCC Chairman Martin,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

FCC Chairman Kevin Martin

Dear FCC Chairman Martin,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

Sincerely,
Jonathan Sirotek

July 31, 2007
Commissioner Robert M. McDowell
445 12th Street SW
Room: 8-C302
Washington, DC 20554

Dear Robert M. McDowell,

As an avid and passionate Internet "surfer," I ask that you do everything you can to foster healthy, price-cutting competition in the high-speed Internet market. While the Federal Communications Commission (FCC) prepares to auction off the prized 700-megahertz band of wireless broadband spectrum, I urge you to reserve at least half of this spectrum for unbridled wholesale competition. The fear is that the FCC will simply allow AT&T, Comcast, and Verizon to dominate the spectrum and bump off any competition. Such bullying behavior has allowed big cable and phone companies to control about 96 percent of the high-speed market. As a result, these companies have bypassed tens of millions of customers who weren't deemed lucrative enough, or they have been allowed by sparse competition to charge exorbitant rates. The result is that more than half of adult Americans don't subscribe to broadband Internet, which is largely too expensive or inaccessible. Please take advantage of this great opportunity and protect our precious public airwaves from the cable and phone giants' competition-killing stranglehold on broadband Internet. Just as importantly, I ask that you hold any broadband service operators in the 700 MHz band to strict "net neutrality" standards, and mandate that they allow consumers to use any equipment, content, application or service without interference in the spirit of the FCC's 1968 "Carterfone" decision.

Sincerely

Lloyd Stein
